LEGAL MANUFACTURING, LLC ANNOUNCES NIB BATTLEWORN™ GLOCK® PISTOLS
Chattanooga Shooting Supply, Inc., to be exclusive distributor of the
NIB BATTLEWORN™ Glock® Pistols

Ringgold, GA, May 17, 2016 - Legal Manufacturing, LLC, a leading provider of firearm plating and technical finishes, and Chattanooga Shooting Supplies, Inc., is pleased to announce an exclusive collaboration to utilize Legal Manufacturing's patent-pending NIB BATTLEWORN™ finish on Glock® pistols. The initial release will be for Glock® G19's, with additional models to follow.

"We are extremely proud to partner with Chattanooga Shooting Supplies, Inc., to bring this exclusive to market," said Jin H. Kim, Chief Executive Officer for Legal Manufacturing. "We believe the BATTLEWORN™ Glock® G19 is a perfect fit for customers looking for a highly versatile daily-carry factory firearm with an incredible finish."

Chattanooga Shooting Supplies, Inc., will be the exclusive distributor for the Legal Manufacturing NIB BATTLEWORN™ Glock® pistols. Please contact your local firearm dealer for availability.

NIB BATTLEWORN™ a low-observable, patent-pending nickel-boron plating treatment offers superior scratch and wear characteristics while simultaneously reducing friction to aluminum, steel, and titanium firearm surfaces. The color of NIB BATTLEWORN™ is a dark shade of gray with an aesthetically distressed, modern "battle" finish. NIB BATTLEWORN™ creates a smooth and uniform plating barrier without adding significant dimension to the metal part, increases the surface hardness of the plated part, and produces a product that is superior to competing plating systems. Legal Manufacturing's proprietary process yields a tough, tactile, and exclusive firearm plating for suppressors, receivers, rail systems, barrels, bipods, slides, trigger assemblies, and other critical firearms components with no adverse impact on operation.
